DETAILED ACTION

Election/Restrictions

Claims 40-82 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species or invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 4. Applicant's election of Group 1 and Species 1, claims 29-39 is acknowledged.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 29-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 29-39 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements or for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the elements or necessary structural connections.. See MPEP § 2172.01. The omitted elements and cooperative relationships are those required to cause the piston to drive liquid from the reservoir into the injection site when the sleeve moves from the second position to the activation position.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or

Art Unit: 3763

improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 29-39 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 and 13-15 of U.S. Patent No. 6,099,504. Although the conflicting claims are not identical, they are not patentably distinct from each other because both groups recite a syringe having a biased nozzle sleeve that activates a citric acid gas generator when moved to an activation position. The scientific fact of dry ice forming a gas when added to a solution is notoriously well known in the art and one of ordinary skill would know to look to these components to make a gas generator.
